July 2007

Matched Initial/Update Report

This feedback report is available to Local Management Entities, providers and the NC Division of Mental Health, Developmental Disabilities and Substance Abuse Services on data gathered for mental health consumers through the North Carolina Treatment Outcomes and Program Performance System (NC-TOPPS). This report provides information gathered through the online NC-TOPPS Initial and Update Interviews. It provides six or seven pages of charts, tables and text information on consumers' demographic characteristics, symptoms, behaviors and activities, service needs, supports and barriers, family and housing issues and outcome measures collected through an interview with the consumer during treatment. It should be noted that not every data element or response category on the NC-TOPPS Interviews are displayed in this report.

Please note that the charts and tables may not always match online queries that you may conduct. The data used in these reports will not necessarily reflect the same points in time. In addition, NDRI who produces these reports cleans the data and removes apparent duplicates prior to preparing the tables and charts.

Additional information about NC-TOPPS and pdf copies of the online NC-TOPPS interviews are located at: http://nctopps.ncdmh.net/

General Information on Interpreting Tables

Types	Λf	Sta	tic	tics

- A <u>count</u> shows the actual number (often designated by the letter "n") of clients.
- ► A <u>percentage</u> is the number of clients with a characteristic or behavior divided by all the clients in the group of interest multiplied by 100. Percentages will be designated with a % sign next to the number.
- ► An <u>average</u> is the sum of a set of numbers divided by the number of numbers in the set. When a number in a cell is an average, the word average will appear in the row descriptor.
- ▶ A <u>median</u> is the middle number in a set of numbers, arranged from lowest to highest. For example, the median for the following numbers: 9, 12, 12, 15, 17, 20, 22, 23, 25, 28, 31, 35, 62 is the bolded number, 22. Medians are important measures of central tendency, especially when a mean may be skewed by a very high or very low value. When a number in a cell is a median, the word median will appear in the row descriptor.

Missing Data

For many of the NC-TOPPS forms entered, a particular item or question may have been left blank. In calculating the means, medians, and percentages in cells of questionnaire items, this missing data is excluded from the calculation. For example, program X may have submitted 50 interviews but in 2 of the interviews, gender was left blank. When the percent of males is calculated, the 25 males are shown as 52% (25/48*100).

Denominator

The denominator for nearly all percentages is the number of cases shown on the bottom left of the page minus item missing data. All exceptions to this general rule are **specifically noted** with appropriate text in the graphic or table. This text will state which group is included or excluded from the denominator, such as "of those in the labor force" or "of those with children."

Multiple Response

"Multiple response" indicates a "mark all that apply" type question in which more than one response to a question is allowed. The total of responses may add to greater than 100%. Examples are health insurance or target population. This is in contrast to items such as gender where only a single response is allowed.

Time periods of behaviors measured

Behaviors are measured at several time periods including the past year, the past 6-months, the past 3-months, the past month, or since last assessment. For the Initial Assessments, the time periods can generally be construed to mean the time period before treatment begins. For the Update Assessments the time is measured from the time at which the interview occurs back one month, 3-months, or since the last assessment.

Definitions of terms

The Appendix at the end of the report gives definitions of acronymns, abbreviations, and other terms used in this report

Notes:

Mental Health consumers who are also being treated for substance abuse (co-occuring) are included in this report.

This table shows the number of matched consumers in this report by provider. This is the number of Initials done during the calendar year 2006 for whom there was a 3-month update interview conducted by June 30, 2007.

Provider	City	ProviderID	Number
Albemarle Mental Health Center	Avon	401	9
Albemarle Mental Health Center	Camden	406	11
Albemarle Mental Health Center	Edenton	403	62
Albemarle Mental Health Center	Elizabeth City	5	234

Innovative Programming Associates, Inc.	Elizabeth City	521	2
Life, Inc.	Elizabeth City	486	3
Total			627

Part I

Part I of this report includes descriptive information about the Initial Interview Matched to 3-Month Update Interview consumers. This information on the types of consumers, time in treatment, types of services needed and being rendered helps in understanding the behavioral changes shown in Part II and Part III of this report.

1-1: Days Between Initial and Update Interview

1-2: Gender

1-3: Race/Ethnicity

1-4: Hispanic

1% of Albemarle consumers are Hispanic.

1-5: Age Group

2-2: Gender and Ethnicity

Female 51 & Over 23%

Female 31 to 50 30%

3-1: Special Populations at Update

3-2: Special Programs at Update

3-3: DSM-IV Diagnoses at Update

Diagnostic Category	
Major depression	50%
Bipolar disorder	17%
Schizophrenia	24%
Anxiety disorder	26%
PTSD	10%
Personality disorder	7%
Alcohol abuse	3%
Alcohol dependence	12%
Drug abuse	3%
Drug dependence	10%

Only most common diagnoses shown. Multiple response

3-4: Attendance at Scheduled Treatment Sessions, During Treatment Since Last Interview

3-5: Family Involvement with Staff Concerning Treatment Services and/or Person-Centered Planning (PCP) During Past 3 Months of Treatment

Family Involvement with	
Treatment Services and/or PCP	14%
Treatment Services	14%
Personal Care Plan	5%

4-1: Services Needed and Received

This chart compares information from the Initial Interview about whether a service area is very important to information from the Update Interview about whether the service was received during treatment.

Part II

Charts and Graphs 4-2 thru 5-9 show consumers' employment, daily activities, living situtation, substance use, and arrests. Some graphs and tables compare information collected at the Initial Interview with information collected in the Update Interview. Initial Interview information is designed to be collected by means of a personal interview with the consumer. The preferred method for completing the Update items in this section is a personal interview; however, a telephone interview, or clinical records or notes are also used. The following chart shows how it was completed for the current group of consumers:

4-2 Update Interview Data Collection Method

4-3: How Often Problems Interfere with Work, School, or Other Daily Activities

5-1: Substance Use in Past Month

5-2: Cigarette Smoking

	Month	
	before tx	during tx
Smoke cigarettes	36%	27%
Smoke a pack a day or more	21%	15%

5-3 Homeless Consumers

	3-Months before tx	During tx since last interview
In Shelters	1	0
Not in Shelters	5	1
Total Homeless	6	1

5-4: Employment

	3-Months before tx	Month during tx
% In labor force	44%	41%
Of those in the labor force		
Employed full-time	40%	41%
Employed part-time	22%	24%
Unemployed (seeking work)	39%	36%
Of those working		
Supported employment	1%	1%
Transitional employment	4%	3%

5-5: Justice System Involvement

7% of Albemarle consumers were under correctional supervision at the time of their Update Interview.

5-6: Arrests

		During tx since last interview
Any arrest	6%	1%
Misdemeanor arrest	5%	1%
Felony arrest	1%	0%

5-7: Children Under 18

32% of Albemarle consumers have children under age 18.

5-8: Custody Issues During Treatment

	# Since Last Interview
Gained custody of child(ren)	0
Lost custody	4
Began seeking custody	1
Stopped seeking custody	0
Continued seeking custody	7
New baby removed from custody	0

5-9: DSS Investigations During Treatment

	# Since Last Interview
Consumer investigated by DSS	
for child abuse or neglect	4
Investigation was due to infant	
testing positive on drug screen	0

Part III

Charts and Graphs 6-1 thru 7-3 compare Initial Interview information with information from Section III of the Update Interview. Section III has questions that must be answered by the consumer. If the consumer is not available, these items are skipped and left blank. Therefore, these items often represent the responses of fewer consumers.

* 81 of the 627 (13%) of Albemarle Update Interviews included a personal interview with the consumer.

6-1: Severity of Mental Health Symptoms

6-2: Psychotropic Medications at Update

91% of Albemarle consumers have a current prescription for psychotropic medications. Of those, 96% take their medication as prescribed all or most of the time.

6-3: Experienced Violence

	3 Months before tx	During tx, since last interview
Physical violence	4%	6%
Sexual violence	1%	0%

6-4: Behavior Problems and Symptoms

		During tx, since last interview
Suicidal thoughts	26%	17%
Tried to hurt or cause self pain	7%	7%
Risky Sexual activity	2%	2%
Hit/physically hurt another person	3%	6%

6-5: Consumer Participation in Positive Activities

7-1: Health Care Received

7-2: Consumer Ratings on Quality of Life

7-3: Helpfulness of Program Services (of those for whom the service is applicable)
